Lingsoft

Language Management Excellence

Lingsoft is the leading provider of language services and language technology solutions in Finland and Northern Europe. Founded in 1986, Lingsoft operates internationally and is e.g. Microsoft Gold Certified Partner.

Lingsoft has been providing translation services for European Union bodies for nearly two decades. With its EU collaboration it is also implementing language technology solutions, such as its machine translation, media monitoring, search and find services and authoring and quality tools and is creating a new kind of platform and ecosystem to support the work of language and policy experts

The company makes available a wide variety of services and solutions for analysing, processing and managing both spoken and written language, including translation, localisation, subtitling and transcription services, search and find solutions and writer's quality tools. Lingsoft® Speech Recognizer and Lingsoft's morphological analyzers can be tailored for any language and specific terminologies, e.g. in health related services.

Lingsoft's solutions are based on the company's world-renowned word and sentence analysis technologies that have become a de-facto industry standard worldwide.
